δς κατασκευάσει την δδόν σου έμπροσθέν σου. 10	53	

Notes

1. Mark keys off Mary's endpoint in Luke's Gospel of 53-54 AD, and when Nero came to the throne: 54 + 14 = 68. Back then, Judea was a province, so the 'kings from' convention must reference Rome. That's pregnant, as Mark's Gospel is written when Rome is investing Jerusalem, via Vespasian and/or Titus. Varro's is the legal AUC everyone must use, when Mark writes; Claudius had made it a law. So this dating system uses Roman AUC, which often has a two-year variance from our BC/AD. Book of Hebrews plays off Mark's Gospel for its own outline, and is obviously datelined in 68 AD. It also matters whether the date is beginning or end of a year, which we don't know. So allow for a two-year variance, to really mean the same date.

The 53-54 was used in Magnificat to plot when the 'payback' to reimburse the Gentiles for Abraham's too-early maturation, would complete. Mary's counting from Christ's Birth, treating His Time as a new unit. Paul does the same thing. I haven't yet worked out all their math. So we're still in the 'ballpark' of the siege, whether you call it the beginning of 68, or nearly 70 AD. Temple will go down end August 70 AD, and the siege was very relaxed until April of that year. From Passover to 9th Av of 70 AD, there was a constant military battle to get into Jerusalem and destroy it, take prisoners, lots of house to house fighting.

Next, '14' represents shortage created by downfall of First Temple = Dan9:14. (See http://www.brainout.net/DAN9V4-19HebOnePagerPARSED.pdf for a full explanation including Bible verses Daniel references, as he speaks his prayer in meter.)

So while Mark writes, the Matthew 24 condition obtains: Jerusalem is surrounded by armies. Parallel situation to Ezekiel playing out the Temple siege to the Babylonian Jews, to Jeremiah chronicling the siege in Jeremiah 52. And of course the Temple goes down 9-10 Ab, 70AD.

So how can we justify suddenly including υ io $\hat{\upsilon}$ θεο $\hat{\upsilon}$, if that text is missing in about half the mss? Because Mark plays on Matthew and Luke's genealogy, to include it. Matthew 1 kept using υ io $\hat{\upsilon}$ Δαυὶδ υ io $\hat{\upsilon}$ 'Αβραάμ. By contrast, Luke's genealogy uses the pattern Ἰωσὴφ το $\hat{\upsilon}$ 'Ήλὶ, ending with το $\hat{\upsilon}$ 'Αδὰμ το $\hat{\upsilon}$ θεο $\hat{\upsilon}$. So one or the other pattern was custom, but not both. So the few mss which read υ io $\hat{\upsilon}$ του θεο $\hat{\upsilon}$, though standard Greek, might not be used in genealogy lists, at least in Matthew and Luke's time. So one could argue Mark nattily concatenates both genealogies via Matthew's υ io υ , to end with Luke's θεο $\hat{\upsilon}$, omitting το $\hat{\upsilon}$ in between. Variants of both structures are in Greek of 1 Chronicles (that Jeremiah wrote). I don't see any combining of υ io υ το υ in genealogy lists, do you?

But what if Mark did mean υ io υ tou $\theta \in o\upsilon$? Then dateline meter shifts to 28: 15, 28, 44, 54. So what would that mean? Mark still plays off Matthew and Luke, and the 54 still plays off Mary's endpoint. But from what beginning? Could still be *Expulsion Of The Jews*, as Luke used; but this time, Claudius' expulsion, Mark dating it to 41AD.

Problem there, as with the 19AD expulsion, is that our records of it, conflict. Bible references Claudius' expulsion in Acts 18:2. But when? We have Dio Cassius (60) saying that the Jews had grown so numerous, Claudius decided not to expel them. But Dio's language implies that it was a subsequent expulsion Claudius contemplated and finally decided against. So often the translator inserts the word 'again', in the Dio passage. Another thing: the Acts 18:2 passage doesn't say that Aquila and Priscilla were actually expelled, but that the edict was the cause of their leaving (διὰ τὸ διατεταχέναι Κλαύδιον χωρίζεσθαι πάντας τοὺς Ἰουδαίους ἀπὸ τῆς Ὑρώμης).

So maybe they left *later* when a *subsequent* edict was issued, but then Claudius didn't enforce it, or let it lapse. For it's obvious that Acts 18:2 is well after 40AD. Mark was not with Paul back then, but would certainly know the events; and by his time of writing, the Book of Acts had been disseminated. For if he makes Claudius' expulsion his bookending theme -- given the current *impending* expulsion, this time from Jerusalem -- he'd rely on his audience knowing, Acts 18:2. Which is all the more poignant, as he himself would have just left Italy, in the wake of Paul's execution and Timothy's release.

Mark's Revised Dateline Meter

One way to check these alternative dateline meters (14 versus 28), is to run the x7 test, to see what other past events Mark might tie, to provide us with his theme. Dateline meters are always thematic. So what back-dates, obtain? Assuming that Mark is playing on the Magnificat date matrix, we have:

* 14 x 7 = 98 - 68 (pretend) = 30, year Christ Died. Peter's dateline meter uses 66 to mean our 68, so we'd 'translate' the 30 into 32. Peter's meter theme datelines back to when Herod started to rebuild the 2nd Temple, because a) it's about to go down, Paul having just died and Peter getting the heads-up from God that he will, too; and b) for his letter is about the Temple of Believers, an update on Paul's prophetic Eph1:3-14 timeline re future history of Church. James based his meter on the Herods as well (both first and last), prior to Peter. James' meter is simultaneously based on when Christ died. So this 14x7 is a handy way for Mark to concatenate his meter to 'tag', both of theirs. Coupled with the standard years-from-king usage -- 14 years after Claudius died or Nero became Emperor, take your pick -- Mark's meter is rather deft.

Year 98 of Christ's age, the Millennium was supposed to begin, 4200 years after Adam's fall in Genesis 3:22. Of course, the immediate date-back is to 30 BC (68-98), when Egypt was finally put under Augustus. So a death, to a death. Their version of AD/BC isn't like ours, but there are similarities, viz., 30 years after the conquest of Egypt, Christ is born; 30 years after he's born, He starts His ministry. 33 years after He's born, same age as the number of years David ruled over all Israel, He dies; with the *extra 7 allotted years* left on the clock, hence Mark's trenchant 14 meter. And Mark, is writing 35 years after that event, tying to Mary's 35 meter, which tied back to the defeat of John Hyrcanus which lead to the defeat of Egypt, which led to Christ being born, etc. Full-circle accounting to show God's Orchestration of Time, is a pregnant and recurring theme in Bible and classical Greek drama.

Since people didn't have high-tech lives, they often would muse over parallels while threshing wheat or getting water. So all these number games, were not only instructive of God's Providence, but entertaining. We all like puzzles. Key to a good puzzle, is to give some clues; then you let the reader/hearer work out the rest, for himself.

* 28 x 7 = 196 - 68 = 128 BC, defeat of Antiochus VII, ties to Mary's Magnificat dateline 35 meter. Mary was tracking Daniel 11 when she crafted her meter. Daniel 11 explains how Daniel 9:27, gets done. So now Rome plays prequel, her armies surround Jerusalem; so will the Rapture happen now? That's what everyone wondered, since 40 years' warning on the Temple -- to 'reimburse' it for the 40-year delay Entering the Land -- will soon end. Paul's Eph1:4 mapped a potential Rapture date that year. (As '66': our BC/AD runs 2 years higher than Roman AUC. See p. 8 of http://www.brainout.net/Eph1DecreeSyllablesREPARSED.pdf.) That's why Book of Hebrews came out. Did Mark write that book, too? Can't tell, for sure. Obviously the author is not Paul, but someone who had been under him.

So which of these two meter themes, is more apt? The **14** is full-circle, idea of CHRIST DIES, THEN ISRAEL DOES TOO, just as Daniel 9:26-27 had explained. The **28** is also full-circle in a different way, parallelling the current fight with the current King of the North, with one in the past. Only in that past, Israel won; *because Rome got involved.* Just as Daniel had foretold. So the 'new' King of the North, invests Jerusalem yet again; this time, freedom will be lost.

Another test: 'is this text repeated elsewhere in the letter'? Both constructions, with and without the article, are used: see Mark 3:11 and 15:39. Other verses use it also, with various case endings: Romans 1:4, a genealogical usage, no article; Luke 1:35, no article, identity; John 10:36, with article, identity; John 19:7, no article, title. There's also a dative in Theodotion's version of Daniel 3:25 (v.92 in Theodotion), but I'm not sure you want to count that (Nebuchadnezzar used a plural, *elahin*).

The more common υἶοῦ του θεου in varying case endings, is primarily used for title/identity: Matt. 4:3, 6; 16:16; 26:63; 27:40; Mk. 3:11; Lk. 4:3, 9, 41; 22:70; Jn. 1:34, 49; 6:69 (only in later mss); Jn. 9:35 (only in later mss); 10:36; 11:4, 27; 19:7 (only in later mss); 20:31; Acts 9:20; 2 Co. 1:19; Heb. 4:14; 6:6; 7:3 (allusion); 10:29; 1 Jn. 3:8; 4:15; 5:5, 20; 5:10, 12; Rev. 2:18.

Because the title usage is so idiomatic, in order to instead stress the genealogical meaning, I'd bet Mark *omitted* the article. The 14 in Matthew's genealogy is thus immediately in view, and therefore the doubled-sevens of Luke's genealogy, both of which play on Isaiah 52:13-14,15 meters (at 42 and 77, respectively, the latter covering the prophecy to the Gentiles).

Mark's Revised Dateline Meter

Finally, there's a **syntax test**; the **28**, flunks it. Syntactically, the sevening must occur either in the first clause, or in the last one. A quotation is a single unit. So, that argues for **14**.

2. **Greyed-out 'variant' text μπροσθέν** σου, **is not counted.** It only appears in the later manuscripts, and is missing even in half of them, going by the Bibleworks 9 collection. Thematically, it makes sense to omit the phrase: for what's on the road before Mark's readers, is Temple Destruction. The herald and King have *already left* the Building, and instead Matthew 24 is laid before them; just as formerly (heh) foretold. *Machaira* rejected, *romphaia* now leads. For Mark quotes Matthew, in Mark 1:2. Matthew 11:10, Christ *interpretatively* quotes an amalgam of Malachi 3:1 and Isaiah 40:3. Exact same quote is in Luke 7:26-27. Since the Isaiah quote comes next in Mark's text (verse 3), and since he obviously quotes Matthew 11:10 as Luke does -- Mark counts on his readers, to know the quote -- so Mark says 'Isaiah'. It's not an error, but *economy of speech*, to set up Mark 1:3. And μπροσθέν σου 's omission, will alert them, stressing the siege.

If, however, we included the phrase as valid, then Mark's ending meter becomes 57 or 58; that still ties to Daniel 9, for his verses 11-12 link that number to Manasseh, as the cause for Temple Downfall. In the Mosaic Law, 57 is the sum of Passover Week and Pentecost; doubled, it's the number of days between first day of Passover and 9th Av; 58, signifies 'missed'. The 'seven' format of this, is 56, very prominent in OT meters from Psalm 90 forward. Still, 57-58 are not datelines (not divisible by either 7 or 3), so you decide whether to include the extra words. They are meant, but whether *Mark actually wrote them*, is debatable. I vote *No, he didn't.*

3. The <u>red underlined letters</u> are elisions or krasis. So if $\upsilon i \circ \upsilon i o \circ \upsilon i$

First clause syllable count range: 10 (two elisions but no extra text), 11 (one elision), 12 (no elisions), 14 (two elisions but includes υίοῦ θεοῦ), 15 (plus του), 16 (minus one elision), 17 (minus both elisions). Only 14 is divisible by 7.

At the end, respective sums would be **49**, **50**, **51**, **53**, **55**, **56**, **57** -- meaning no elision but yes include υ io ϑ tov $\theta \in 0$; else 57 with the three elisions debited, plus $\xi \mu \pi \rho \circ \sigma \theta \in \nu$ oov. Three more, sum no higher than 60; which is divisible by 3, but not 7. You could argue the base as *years since Judea a province* -- John uses that convention for his dateline in Rev 1:1-3 -- and still equate to our 68 AD. Jude uses Trinity meter for a dateline, also '60', seems to use the same convention.

So now the x3 test (Trinity meter): 180 years prior, 112-114 BC range; I see nothing historically significant re the Gospel content. If we instead say x7, then 420 years prior, circa 352 BC. I don't find anything there thematically related, either. Yet here (http://books.google.com/books?id=bgFPIeE727wC&lpg=PA99&ots=CS4b7NfskA&dq=352%20BC&pg=PA99#v=onepage&q=352%20BC&f=false), Philip of Macedon claims Thermopylae *in order to rescue the Delphic Temple*. Was that event so well known, it should be tagged by Mark in parallelism?

Our last dateline meter candidate would be 56; it removes both $\upsilon \iota o \upsilon \upsilon o \upsilon o \upsilon o o o o o with no elisions, either. That would be a cute parallel to Paul's use of <math>56$, yet a hard argument to make. What happened in 10-12 AD to justify the tie? Or, Christ age 10-12? Surely the leaving-behind at the Temple, wouldn't be the analogy here? Closest relevant thing I could find, is that *Quirinius' political appointment over Judea province, then ended.* So again Mark tags Luke at the opposite end, since back in 4/2 BC, Quirinius was in Syrian garrison mentoring young Gaius, handily available to collect the first tax the Romans and not the Herods, would have to administer.

 $56 \times 7 = 392$ years prior, would be kinda pregnant; Paul even played on it: 322-324 BC, Alexander's death at age 33, the impetus and *raison d'etre*, for Daniel 7-11. Paul's 56×7 benchmark was 336 BC, year Alexander's father died; so that year, the son whose succession had been in doubt, suddenly became king. Every Greek reading Ephesians, would smile at that meter, which of course Daniel and even Maccabees, were dedicated to explaining. If we say 56×7 here for Mark, then he benchmarks the end of Alexander also at age 33, idea that *all the history God foretold, is coming to pass for both govim and Jew.*

- **4.** Even so, the meter offering the most full-circle wit, tie to NT Gospels and then-extant Scripture, convergence and relevance, is still the 14. That's the most pregnant Time meter in the Bible, for we all know history converges on Christ. Witness:
 - O By Mary's '54' endpoint and **Mark's final clause**, Church not Israel, has the Time Baton. So Mark's **1st clause**, **14** x **7** years from His Birth, Time Scheduled to End with His 2nd Coming, is now on hold.

Mark's Revised Dateline Meter

- That 14 remains pending, since God in Daniel 9:26, had to allot 7 of it within His Lifetime -- which didn't get spent, since He died early -- and the other 7, also remains reserved for the Tribulation. Hence Paul's meter in Ephesians 1:3-14, plots a rolling series of What-IF-Rapture dates. Mark's Gospel sarcasm, retrospectively serves to explain Paul's sad prediction that the Rapture likely won't happen soon, due to Church apostasy. Peter had focused on the same topic, as had James before him. Both letters' dateline meters used the Herods.
- o **Second clause**: 14 years after Mary's endpoint when Mark writes, Jerusalem is under siege *22-23 years early*, rather than closer to Messiah's 2nd Coming aka the Millennium (under the Daniel schedule, Temple should have stayed up until 94 AD, mid-Trib). And now, instead of being 23 years after He died when Paul wrote, it's 33 years. So Paul had meter-marked 66, an equidistance 'reimbursement' to the world, which has now had as much time *after* He lived, as when He lived, Psalm 90:15 answered. So will the temple go down during the *next four* years, hence 27? Answer would be *yes*, but instead of it being mid-Trib, that hanging-chad seven due to His Dying Early, is used up.
- O **Third clause**: Then again, when the 40 years is up, if the Trib begins then as everyone expected, the Temple would remain.. until the 43rd year. Who knew how long the siege would actually last, if a pact will be made as Daniel 9:27 said would happen, mid-week? For the Lord warned everyone to GET OUT as soon as they see Jerusalem surrounded by armies. Mark of course is out, having been with Paul, who'd just been executed. So like Peter now dead, and Jude maybe-dead, Mark now plays Ezekiel to those in Diaspora. Where the others, would soon ideally join them.
- Fourth clause: just as Mary calculated, Abraham's too-early-maturation credit of 53.5 years now finally reimbursed, the last 3.5 years aka the 'time of Jacob's trouble', can finally play. But are left in ellipsis, since now Church must mature for the last seven years, to even begin. In which case, maybe only the first seven of the 14, will play. *Beginning at*, 54+14 or so...
